

Jatin Shukla

Noida, Uttar Pradesh | +91-9116237146 | shukla.jeetu2550@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Professional Summary

AI/ML Engineer with around 3 years of experience building production-grade AI agents, RAG systems, ML models, full-stack AI applications, and workflow automation tools. Skilled in Python, FastAPI, PyTorch, Scikit-learn, LangChain, LangGraph, REST APIs, vector search, cloud deployment, and GenAI systems.

Technical Skills

Languages: Python, SQL, JavaScript, C++, C#

AI / ML: Machine Learning, Deep Learning, PyTorch, Scikit-learn, Regression, Classification, Feature Engineering, Model Evaluation

GenAI / Agents: AI Agents, LLM Applications, RAG, Prompt Engineering, LangChain, LangGraph, Tool Calling, Agentic Workflows

Data / Retrieval: FAISS, Vector Search, BM25, Cross-Encoder Reranking, Embeddings, Semantic Search, TF-IDF, Document Parsing

Engineering / Deployment: FastAPI, Flask, REST APIs, Docker, Azure, CI/CD, Vercel, Render, Supabase, SQLite, Jolib, Git, GitHub

Experience

Senior Engineer – AI/ML

Mar 2026 – Present

Havells India Ltd., Noida

- Built AI agents for HR applicant shortlisting, automating resume screening, JD matching, and ranking workflows to reduce manual review effort by 40%+.
- Developed agentic ideation, research, and prototyping workflows with 10-step reasoning pipelines to improve early-stage solution turnaround by 30%.
- Enhanced internal AI workflows with retrieval, prompt orchestration, scoring logic, and user-facing flows to improve consistency across 4 decision areas.

AI/ML Engineer

Jan 2025 – Feb 2026

Havells India Ltd., Noida

- Built PyTorch ML models for fan performance prediction across air delivery, velocity, and pressure, improving engineering accuracy by 18–22%.
- Developed LED thermal prediction models to estimate heat generation at critical points, reducing design evaluation turnaround by 35%.
- Engineered a Tri-Branch PointNet inference pipeline with optimized preprocessing and Jolib deployment, reducing end-to-end latency by 35%.
- Built API-driven internal tools using Flask, React, and VTK.js, enabling 30+ engineers to consume AI outputs through stakeholder-friendly interfaces.
- Created 3D and point-cloud evaluation workflows handling 10+ design configurations per week, reducing manual analysis and prototyping dependency.

Projects

Agentic AI Code Review Bot

[Live](#) | [GitHub](#)

- Built a full-stack AI code review platform analyzing GitHub pull requests across 4 dimensions: bugs, security, code quality, and test coverage.
- Designed an 8-agent LLM orchestration pipeline to generate severity scores, risk summaries, GitHub comment previews, and draft autofixes with 100% human-controlled merge decisions.
- Shipped a React, Vite, FastAPI, Render, Vercel, and SQLite workflow with 10 review APIs to reduce repetitive reviewer effort and speed up PR triage.

AgentFlow – Multi-Agent AI Platform

[Live](#) | [GitHub](#)

- Built a multi-agent AI orchestration system using FastAPI, LangGraph, Groq, React, and SQLite, routing tasks across 4 specialist agents.
- Designed a 6-stage workflow with memory retrieval, supervisor planning, tools, reviewer scoring, and human approval to improve reliability.
- Implemented workspace memory, run history, and trace persistence capturing 5 audit artifacts for quality review and workflow handoff.

Nexora – AI Study Assistant

[Live](#) | [GitHub](#)

- Built a RAG-based AI assistant using React, Vite, FastAPI, and Supabase to support grounded Q&A over PDFs and web URLs.
- Engineered FAISS, BM25, and Cross-Encoder retrieval workflows to improve relevance across 3 pipeline stages and support 6 answer modes.
- Developed quiz generation, scoring, explanations, and weak-topic feedback to convert static content into an interactive study workflow.

HireFit – AI Resume–Job Matcher

[Live](#) | [GitHub](#)

- Built a full-stack AI/ML application using FastAPI, React, Vite, Tailwind CSS, Python, and Gemini API for 4 resume-JD workflows.
- Designed scoring pipelines using TF-IDF, cosine similarity, evidence validation, and prompt reasoning to assess 5 fit signals.
- Implemented keyword coverage, shortlist-risk analysis, safer resume rewrites, and multi-JD comparison to support 4 recruiter decision areas.

IoT-Enabled Digital Twin for Post-Harvest Loss Minimization

[Link](#)

- Built an Azure-based AI and IoT system using Raspberry Pi and sensors for predictive analytics and monitoring, reducing potential losses by 15–20%.

Education

National Institute of Technology, Hamirpur

2023 – 2025

M.Tech, Computer Science and Engineering

CGPA: 9.15/10

Institute of Engineering and Technology, Lucknow

2018 – 2022

B.Tech, Chemical Engineering

CGPA: 7.8/10
